

BP2000

Industrial Grade Air Purifier

Designed to handle high concentrations of chemicals, gases, odors, particles and biological contaminants, the BP2000 delivers superior air quality for residential and commercial spaces, office buildings and any workshops or production facilities that require effective air filtration.

The standard configuration for BP2000 is standalone unit for general air purification.

For virtually any application that requires removal of chemicals, vapors and particles directly at the source, BP2000's wide selection of flexible or articulated arms, hoods and ducting accessories capture any contaminants before they spread into the environment.
